1. This action is in response to the application received on January 5, 2004. Claims 1-17 are pending.
2. The drawings received on January 5, 2004 are accepted by the examiner.
3. The following is an examiner's statement of reasons for allowance:

The cited references describe systems and methods of monitoring the power or current used by a data processing system and limiting the power used by the data processing system by throttling the processor clock or by reducing the processor frequency and/or voltage. None of the cited references teach or suggest a preliminary power limited state (second setting means and second controlling means) for quickly transitioning to a limited power state while the data processing system initializes a throttling interface and transitions to a throttling power limited state (first setting means and first controlling means).

The claimed invention is allowable over the art of record because the art of record does not teach or suggest a method, a program or apparatus for limiting the power consumed by an information processing system when the monitored power exceeds a predetermined threshold comprising power monitoring means, first and second setting means and first and second controlling means as claimed in independent claims 1, 15 and 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
